

unions, and thrifts to collect race and gender information for small business borrowers. But while the Access and Openness Act requires depository institutions to keep such records, it does not require borrowers to disclose race and gender information if they do not want to.

The Access and Openness Act will effectively eliminate the Federal Reserve's regulation B, which prohibits lenders from collecting data regarding an applicant's gender and race.

The guiding principle behind this bill is time-tested and simple: sunshine is the best disinfectant. Without the specific knowledge of the demographic composition of small business borrowers, including those that apply but do not get approval, we will never be able to unmask discriminatory lending practices or systematically monitor programs that advance women and minority business ownership.

The Access and Openness Act is modeled after the Home Mortgage Disclosure Act, which requires banks to report demographic data on home mortgage lending. It is my hope that this bill will move banks to operate as effectively in the women and minority small business lending market as they have in the home mortgage market where the collection of demographic data has opened lending to underserved communities.

Mr. Speaker, I will include at this point in the RECORD the following supporting material:

ACCESS AND OPENNESS IN SMALL BUSINESS
LENDING ACT OF 2001
SUPPORTING ORGANIZATIONS

National Women's Business Council, a federal commission, Association for Women's Business Centers, Women's Business Development Center, Milken Institute, National Community Reinvestment Coalition, Hispanic Economic Development Corporation, and Alternatives Federal Credit Union.

Southern Rural Development Initiative, National Congress for Community Economic Development, Cabrillo Economic Development Corporation, Pittsburgh Community Reinvestment Group, Chelsea Neighborhood Housing Services, Rural Opportunities, and Greater Holyoke Community Development Corporation.

Community Action Committee of the Lehigh Valley, Texas Community Reinvestment Coalition, Charlotte Organizing Project, Common Wealth Development, Wisconsin, Western New York Law Center, and California Reinvestment Committee.

Rural Housing Institute, National Neighborhood Housing Network, Vermont Slauson Economic Development Corporation, Los Angeles, Lawyers' Committee for Civil Rights Under Law, Coastal Enterprises, Inc., and Mon Valley Initiative.

NATIONAL COMMUNITY
REINVESTMENT COALITION,
Washington, DC, June 21, 2001.

Hon. JAMES P. MCGOVERN,
House of Representatives, Cannon House Office
Building, Washington, DC.

DEAR CONGRESSMAN MCGOVERN: The National Community Reinvestment Coalition (NCRC) strongly supports "the Access and Openness in Small Businesses Lending Act of 2001" as essential to the efforts of lending institutions, community organizations, and

local public agencies to increase access to capital and credit for women- and minority-owned businesses. NCRC's 800 member organizations—community groups and local public agencies—around the country also commend the leadership of Representatives McGovern and Morella in sponsoring this bill.

The Access in Small Business Lending Act of 2001 would amend the Equal Credit Opportunity Act (ECOA) to require banks, thrifts, and credit unions to report the race and gender of the small businesses from which they receive applications and to which they make loans. This data is to be disclosed regardless of whether the application is made in person, over the phone, or received via mail or the Internet.

This data disclosure requirement promises to greatly increase access to credit for minority and women-owned businesses. Working together, community groups, lending institutions and local public agencies would analyze publicly available small business data and identify the small business owners and neighborhoods that remain underserved. Stimulated by data disclosure, these types of community-lenders partnerships are a win-win: bankers seize upon untapped markets and find additional profitable lending opportunities; community organizations and small businesses receive more access to private sector credit with which to revitalize their neighborhoods and expand their commercial base.

An amendment to HMDA (Home Mortgage Disclosure Act) data in 1990 to require the reporting of race and gender of applicants unleashed a tremendous increase in lending to traditionally underserved populations. From 1993 to 1999, for example, the number of conventional home purchase loans increased 119 percent for African-Americans, 116 percent for Latinos, and only 42 percent for whites.

Unfortunately, the state of affairs is not as sanguine in the small business area. The truncated CRA small business data (which only reveals the census tract in which a loan is made) suggests that much progress needs to be made. From 1996 to 1999, the number of small business loans increased 39 percent overall but only 8 percent in low-income census tracts. As a result, the percent of small business loans made in low- and moderate-income tracts declined from 21 percent to 18 percent, despite * * *

WORLD AIDS DAY

(Mrs. CLAYTON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CLAYTON. Mr. Speaker, I would like first to thank the gentlewoman from California (Ms. LEE) for asking us to really speak out on this worldwide issue. In fact, we have an opportunity to speak out on this issue 2 days before what we call World AIDS Day. As this day approaches, we are faced with the grim statistics about the spread of HIV/AIDS. From the rural South in my area of North Carolina to South Africa, greater efforts have to be made to fight the spread of AIDS. We hear these statistics. They do not even prick our consciousness. We have got to find a way to make sure that these statistics do not become just sheer rhetoric.

A recent story on the AP wire reports that the AIDS epidemic is spreading across eastern Europe, with HIV infection rates rising faster in the Soviet

Union than anywhere else in the world. I would like to submit this article for the RECORD.

There has been more than 75,000 new cases of HIV in Russia as compared to 56,000 cases last year. Here in the United States, HIV infections among U.S. women have increased significantly over the last decade, especially in communities of color.

We must do more. We have an opportunity to do more. The United States must provide more resources for the global AIDS fund of the United Nations. We can do this by providing the resources and being a leader. We must develop long-term strategies to make sure that we rid the world of HIV infections.

REPORT: AIDS SWEEPING EASTERN EUROPE

(By Mara D. Bellaby)

MOSCOW (AP).—The AIDS epidemic is sweeping across Eastern Europe, with HIV infection rates rising faster within the former Soviet Union than anywhere else in the world, according to the latest U.N. report on AIDS, published Wednesday.

The combination of economic insecurity, high unemployment and deteriorating health services in the region are behind the steep rise, which shows no signs of abating, said U.N. officials, in Moscow to launch the report.

Worldwide, "HIV/AIDS is unequivocally the most devastating disease we have ever faced, and it will get worse before it gets better," Peter Pilot, executive director of the Joint U.N. Program on HIV/AIDS wrote in the report, which is updated annually ahead of World AIDS Day, held every Dec. 1.

In Russia, more than 75,000 new cases of HIV infection were reported by early November, compared to 56,000 new cases last year.

"That works out to about 10,000 new cases every month," said Gennady Onishchenko, Russia's first deputy health minister. "This is our reality. . . . It is a very serious problem."

Ukraine has the highest HIV prevalence rate in the region, with an estimated 1 percent of adults infected. In the small Baltic nation of Estonia, 1,112 new cases of HIV infection were recorded in the first nine months of this year, compared to only 12 in all of 1999, officials said.

The U.N. report said that in Eastern Europe, as in the rest of the world, AIDS affects a disproportionate number of young people. The main method of transmission in the former Soviet Union is through injecting drugs.

"It is a teen-age epidemic—teen-agers experimenting with drugs, teen-agers experimenting with sex," Pilot said.

Officials in Eastern Europe have blamed the epidemic's increase partly on the sudden opening of borders, the growth of organized crime and weakened social services following the collapse of communist rule a decade ago.

Many young people, bored and unsure about their future, turn to drugs or unprotected sexual encounters, officials said.

Since the first clinical evidence of AIDS appeared 20 years ago, more than 22 million people have died. AIDS is the leading cause of death in sub-Saharan Africa, which has been hit hardest by the epidemic.

This year, African nations will experience 3.4 million new infections and 2.3 million deaths—losses that not only drain national budgets but also put future generations at risk, depriving children of parents and local economies of their work force, officials said.

U.N. officials predicted that some of the most affected African nations could lose

more than 20 percent of their GDP by 2020 because of AIDS.

The U.N. report said unsafe sex was on the rise in high-income countries such as the United States and some European nations, subsequently triggering a rise in sexually transmitted diseases, including HIV.

"All the emphasis is put on treatment, which has had a major impact, but prevention has been neglected and education has been neglected," Piot said. "The price that we will have to pay for that neglect is very high."

The report found a bright spot in Cambodia, where prevention measures have had a significant impact, but officials also warned about the deteriorating situation in China and in the Caribbean, which continues to be the second most affected region in the world.

Last June, the U.N. General Assembly held a special session on HIV/AIDS, winning pledges from governments to pursue new preventive actions and contribute more funds to the fight. The United Nations estimates that some \$10 billion will be needed every year to fight AIDS in low and middle-income countries.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. JEFF MILLER of Florida). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GANSKE) is recognized for 5 minutes.

Mr. GANSKE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

JUMPERTOWN QUILT PROJECT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. WICKER) is recognized for 5 minutes.

Mr. WICKER. Mr. Speaker, ever since the events of September 11, people in communities large and small have looked for ways to show their support for the victims of terrorism and to express the pride they have in this great country.

I rise today to share the story of an inspiring, patriotic project undertaken in a community in Mississippi's First Congressional District. The students and residents of Jumpertown, in Prentiss County, Mississippi, chose a unique way to share their words of support and patriotism by including them in a quilt. I was honored to be asked to deliver it to President Bush.

Mrs. Nancy Johnson, a teacher at the school, conceived the idea, which

quickly became more than a school project. It was enthusiastically embraced by the entire community.

Mrs. Betty Sue Geno started the process by cutting cloth squares, which were then distributed to each class, kindergarten through 12th grade, in the 365-member student body at Jumpertown School. The office staff and lunchroom ladies also participated. Each group was given the opportunity to create and decorate the individual squares.

When all pieces were completed, Mrs. Penny Padgett designed and sewed the quilt top. Then the squares were turned over to a group of ladies in the community who met at the Barksdale Parents Center for an old-fashioned quilting bee.

The ladies who put it all together were Mrs. Ruby Smart, Mrs. Sue Nell Searcy, Mrs. Mary Odle, and Mrs. Louise Robinson. They were assisted by teachers and staff members from Jumpertown School, including Lisa Cousar, Eleshia Jumper, and Martha Mitchell.

Mr. Speaker, I was proud to be part of a patriotic ceremony on November 12, the day after Veterans Day, to present the quilt officially. The entire school assembled in the gymnasium, along with many people from the community, to pay tribute to Prentiss County veterans and to celebrate this very special project.

Prentiss County superintendent of education Judy Perrigo and Jumpertown principal Kenneth Chisholm took part in the program. It included patriotic musical selections from students Kayla Robinson and Megan Downs and teacher Norma Jo Jones. Sixth-grader Channing Durham also read a poem he had written.

In her remarks, Mrs. Johnson said, "Much as our Nation has come together, our community has pulled together on this quilt. We are sending this to the President with the hope that he knows that in Jumpertown our prayers, our thoughts, and our support are with him and the country."

This project in Jumpertown, Mississippi, Mr. Speaker, is a reflection of the American spirit which has sustained our Nation during these difficult times. I proudly accepted this quilt on behalf of the entire United States Congress, and I look forward to taking it to President Bush at the White House.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from the District of Columbia is recognized for 5 minutes.

(Ms. NORTON addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SMITH) is recognized for 5 minutes.

(Mr. SMITH of Michigan addressed the House. His remarks will appear

hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

(Mr. PALLONE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

BORDER POINTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SOUDER) is recognized for 5 minutes.

Mr. SOUDER. Mr. Speaker, on Tuesday evening after returning from a day and a half visit with the Canadian parliamentarians and government leaders in Ottawa, I spoke briefly about the importance of our mutual trade and our mutual concerns about terrorism.

It is important when we are discussing antiterrorism efforts on our north and south borders that we not forget the importance of trade. The trade crossing just the Ambassador Bridge between Windsor, Ontario, and Detroit, Michigan, equals all U.S.-Japan trade.

That said, Americans as well as Canadians and Mexicans are concerned about the movement of terrorists and other illegal activity along our borders. It is not just about terrorists and possible terrorists. Most Americans have been aware of the narcotics problems along the U.S.-Mexican border over the last decade. Andean cocaine and heroin move into the U.S. through Mexico and the Caribbean Sea. The northern border does not have the fences and patrols that we have along the south border.

Now, as drug patterns change in the United States, Canada has become a major narcotics conduit to the United States, as well: Ecstasy, coming mostly from the Netherlands, across into the U.S. from Canada; ephedrine and chemical precursors for methamphetamines, meth, for Ecstasy and other synthetic drugs are moving through Canada. These are in fact our fastest growing drug problems.

Furthermore, potent marijuana from British Columbia, called B.C. Bud, and from Quebec, called Quebec Gold, have potencies similar to cocaine. In fact, Quebec Gold sells for about the same price as cocaine in New York City. But it is important for Americans to understand two basic points: one, it is our consumption that has resulted in our hemispheric neighbors turning into transit and drug-producing nations; and, B, in the case of Canada, the drug-trafficking, like the movement of terrorists, goes both ways.

This does not change the need for border control. The borders are often our best chance to catch drug traffickers and terrorists before they lose themselves within our free nations; thus, we have to work on border control.
